

I am a cell phone user. I am opposed to allowing cell phone use aboard public aircraft.

There is already too much noise and intrusion on one's space inside air planes. I do not desire to listen to my neighbor's business, love life, family interests, or any other subject that a potential cell phone user cares to make. A person talking on a cell phone in such close proximity is an intrusion on me that I do not want. Once in your seat, one does not have the option to change seats or get off the plane. Please do not allow any additional use of cellphones on air planes once the door is closed.

Thanks for your consideration

Jerry B Cox
